

**Once your project has been completed the Alpine Companies representative on site will sign the copies you provide.**

**#11 Preparing Concrete to be worked on:**

Alpine companies will drill numerous 1.5 inch diameter holes as needed in the concrete areas to be worked on for Mud jacking. These holes will be grouted to match the original existing concrete to as original as possible. While completing your repair Alpine Companies will not be responsible for damage and is to be notified before any work begins of these issues, Capped concrete slabs, cracked concrete, concrete thinner than 4 inches, concrete shifted laterally, rebar, caissons, extra thick edges or mono pad style concrete, bricks, support posts, roof overhangs, doors, windows, planters decorative or weight bearing, electrical, plumbing, HVAC, sewer lines or anything running in or through the areas being worked on.

**Special Instructions for you the homeowner/customer:**

Once we leave the job site for any repair we do, it is your responsibility to maintain the following, no exceptions. Unless noted on contract.

Positive drainage to the areas worked on with proper backfill and weed/water blocking materials, Downspout extension, downspout additions if needed, repairs to sprinkler systems, heads, french drains, chase drains, window wells, homes interior or exterior, concrete, foundations, brick, stucco, painted surfaces, wood products and decks, electrical, plumbing, gas, HVAC, drain lines, sewer lines, doors, sealing any gaps and cracks where water can intrude. Failure to comply with these conditions will render your warranty void. Alpine Companies will expect you the customer/project representative to have engineering, permits and inspections in place unless noted otherwise on every contract provided by Alpine Companies. Alpine Companies will only complete the repairs as noted on the contract, additional work will be gone over, accepted by you the customer/project representative first, then charged accordingly.
